VINAY NALAVADE

QA Engineer | vinaynalavade0704@gmail.com | +91 93593 45433 | Pune, India

PROFESSIONAL SUMMARY

Results-driven QA Engineer with 4+ years of experience in manual and automation testing across Banking and Insurance domains. Proficient in Selenium WebDriver (Java), Postman API testing, SQL data validation. Adept at designing comprehensive test cases, executing STLC-aligned test cycles in Agile environments, and driving defect resolution. Reduced manual validation effort by ~70% through Python-based commission automation at ICICI Prudential.

TECHNICAL SKILLS

Languages	Core Java · Basic Python (Data Validation and Automation) · SQL
Automation	Selenium WebDriver · TestNG · Maven · Fireflink (Script-less) · POM (Page Object Model)
API Testing	Postman · REST API · Status Code & Response Validation
Testing Skills	Manual Testing · Regression · Smoke · Functional · STLC & SDLC
BI & Reporting	SAP BusinessObjects (SAP BO) · Advanced Excel · Pivot Tables
DevOps & Tools	Git · GitHub · Jenkins · Jira · Eclipse · VS Code
Methodologies	Agile / Scrum · Test Case Design · Defect Lifecycle Management

PROFESSIONAL EXPERIENCE

QA Analyst | Infosys Ltd. (via UNIZEN TECHNOLOGIES Pvt Ltd.) *Sep 2025 – Present | Pune*

- Execute functional, regression, and smoke test cycles across enterprise banking/insurance applications within 2-week Agile sprints; maintained 95%+ test coverage across 3 active modules.
- Authored and reviewed 80+ test cases per sprint in collaboration with BAs and developers; identified and logged 30+ defects across UAT and regression phases using Jira.

QA Analyst | ICICI Prudential Life Insurance (via Eureka Outsourcing Solutions Pvt Ltd.) *Mar 2025 – Sep 2025 | Mumbai*

- Engineered Python automation scripts to validate commission deductions across 8–10 policy attributes (premium, rider, fund allocation, etc.), replacing manual VBA-based processes and reducing validation effort by ~70%.
- Extracted and reconciled large-scale policy datasets from SAP BusinessObjects and Life Asia, ensuring full IRDAI regulatory compliance through rule-based validation logic.

Software Test Engineer | Swift Solution Pvt Ltd. *Jan 2023 – Feb 2025 | Pune*

- Designed and executed 200+ test cases for web applications across Banking and E-Commerce domains; covered functional, regression, and integration test scenarios across multiple sprint releases.
- Built and maintained automated smoke and regression test suites using Selenium WebDriver (Java) + TestNG with Page Object Model (POM) architecture; reduced regression cycle time by approximately 25%.
- Wrote SQL queries to validate backend data integrity for loan, order, and customer datasets across Banking and E-Commerce modules.

KEY PROJECTS

Loan Origination System (LOS) · *Banking Domain* Java · Selenium WebDriver · TestNG · Postman · SQL · Jira

- Designed & executed 150+ test cases covering loan application submission, customer eligibility verification, document validation, credit assessment, and loan approval workflows; executed functional, integration, and regression testing across multiple sprint releases.
- Automated critical end-to-end loan processing scenarios using Selenium WebDriver and TestNG; validated loan-related REST APIs through Postman, verified backend data integrity using SQL queries, and logged, tracked, and retested 40+ defects using Jira.

Commission Validation Automation · *Insurance Domain* Python · SQL · SAP BO · Life Asia · Advanced Excel

- Built Python-based audit scripts to automate commission verification across 8–10 policy attributes, replacing manual VBA-driven processes and cutting validation time by ~70%.
- Ensured IRDAI regulatory compliance through rule-based validation logic; reconciled large-scale policy datasets extracted from SAP BO and Life Asia to support audit and reporting workflows.

E-Commerce Order Management System (OMS) · *Retail Domain* Java · Selenium WebDriver · Fireflink · Postman · Manual Testing

- Designed and executed test scenarios for order creation, inventory synchronization, payment processing, shipment tracking, returns management, and refund workflows across multiple sales channels.
- Automated critical regression and smoke test suites using Selenium WebDriver and TestNG; validated REST APIs through Postman, verified order and inventory data using SQL, and tracked defects throughout the Agile development lifecycle using Jira.

EDUCATION & CERTIFICATIONS

Bachelors of Technology – Computer Science & Engineering · DBATU University – Fabtech Technical Campus *CGPA 7.98 · 2024*

(Lateral entry via Diploma; full-time employed from 2023)

Diploma – Computer Technology · Maharashtra State Board of Technical Education – Brahmdevdada Mane Polytechnic *84.00 % · 2021*

Certifications: Java Full Stack Development (Testing) · Java Basics
