VINAY NALAVADE

QA Engineer | Selenium, Java, TestNG, Maven, Test Automation, Postman, SQL

Pune, India | vinaynalavade0704@gmail.com | +91 93593 45433 | linkedin.com/in/vinaynalavade | Portfolio

PROFESSIONAL SUMMARY

QA Engineer with nearly 4 years of experience in manual and automation testing across Banking, Insurance and E-Commerce applications. Builds and maintains automated regression and smoke suites using Selenium WebDriver (Java), TestNG, Maven and the Page Object Model (POM), supported by Postman REST API testing and SQL data validation. Experienced in Agile/Scrum teams across the SDLC and STLC, collaborating with BAs and developers on test design, defect tracking in Jira and release validation. Reduced regression cycle time by ~25% through Selenium automation and validation effort by ~70% through Python automation.

CORE TECHNICAL SKILLS

Test Automation: Selenium WebDriver, Automated Testing, TestNG, Maven, Page Object Model (POM) Framework, Fireflink (Script-less)

Languages: Core Java, Python (Basic; Data Validation & Automation), SQL

API & Database Testing: Postman, REST API, Status Code & Response Validation, SQL Data Validation

Testing: Regression, Smoke, Functional, Integration, UAT, Manual Testing, Test Case Design, STLC & SDLC, Defect Lifecycle Management

CI/CD, Tools & Practices: Jenkins, Git, GitHub, Jira, Eclipse, VS Code, Agile / Scrum

Data & Reporting: SAP BusinessObjects (SAP BO), Advanced Excel, Pivot Tables

PROFESSIONAL EXPERIENCE

Senior QA Engineer | UNIZEN TECHNOLOGIES Pvt Ltd., Pune **Sep 2025 – Present**

Client: Infosys Ltd. (enterprise banking application)

- Execute functional, regression and smoke test cycles in 2-week Agile sprints, maintaining 95%+ test coverage across 3 active modules.
- Author and review 80+ test cases per sprint with BAs and developers; identified and logged 30+ defects across UAT and regression phases using Jira.

QA Analyst | Eureka Outsourcing Solutions Pvt Ltd., Mumbai **Mar 2025 – Sep 2025**

Client: ICICI Prudential Life Insurance

- Engineered Python automation scripts to validate commission deductions across 8–10 policy attributes (premium, rider, premium collection), replacing manual VBA-based processes and reducing validation effort by ~70%.
- Extracted and reconciled large policy datasets from SAP BusinessObjects and Life Asia, applying rule-based validation logic to support IRDAI regulatory compliance.

Software Test Engineer | UNIZEN TECHNOLOGIES Pvt Ltd., Pune **Jan 2023 – Feb 2025**

Web applications in Banking and E-Commerce domains

- Built and maintained automated smoke and regression test suites using Selenium WebDriver (Java), TestNG and Page Object Model (POM), reducing regression cycle time by ~25%.
- Designed and executed 200+ test cases covering functional, regression and integration scenarios across multiple sprint releases.

PROJECTS

Loan Origination System (LOS) **Banking Domain**

Technologies: Java, Selenium WebDriver, TestNG, Postman, SQL, Jira

- Automated critical end-to-end loan processing scenarios using Selenium WebDriver and TestNG; validated loan REST APIs in Postman and verified backend data integrity with SQL queries.
- Designed and executed 150+ test cases (functional, integration, regression) across loan application, eligibility, document validation, credit assessment and approval workflows; logged, tracked and retested 40+ defects in Jira.

E-Commerce Order Management System (OMS) **Retail Domain**

Technologies: Java, Selenium WebDriver, Fireflink, Postman, SQL, Jira

- Automated critical regression and smoke suites using Selenium WebDriver and TestNG; validated REST APIs via Postman and verified order and inventory data using SQL.
- Tested order creation, inventory synchronization, payment, shipment tracking, returns and refund workflows across multiple sales channels; tracked defects through the Agile lifecycle in Jira.

Commission Validation Automation **Insurance Domain**

Technologies: Python, SQL, SAP BO, Life Asia, Advanced Excel

- Built Python audit scripts automating commission verification across 8–10 policy attributes, cutting validation time by ~70% and supporting IRDAI compliance and audit reporting.

EDUCATION & CERTIFICATIONS

BTech – Computer Science & Engineering | DBATU – Fabtech Technical Campus | CGPA: 7.98 **2024**

Diploma – Computer Technology | MSBTE – Brahmdevdada Mane Polytechnic | 84.00% **2021**

- Java Full Stack Development (Testing) – Qspiders Institute
- Java Basics – Qspiders Institute
- Data Science, Machine Learning, Deep Learning, NLP Bootcamp (Ongoing) – Udemy
